## DETAILED ACTION

### *Election/Restrictions*

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-4 and 6-9, drawn to an image coder for performing compression coding on an image signal.

Group II, claim(s) 5, drawn to an image coder using inter-frame compression of forward prediction and bi-directional prediction.

Group III, claim(s) 10 and 11, drawn to a method of switching whether or not to use bi-directional prediction in accordance with an image quality of a reference image.

Group IV, claim(s) 12-16, drawn to a method of changing a frame rate by generating a code so that a frame of the input image signal and a frame of a reference image are identical.

2. The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the special technical feature of Group I is the particular feature of judging a degree of difficulty of coding and input image signal; the special technical feature of Group II is the particular feature of operating states for normal coding and frequency and frame rate changes; the special technical feature of Group III is the particular feature of switching whether or not to use bi-directional prediction in accordance with the image quality of the reference image by using a quantizer scale; and the special technical feature of Group IV is the particular feature of changing a frame rate by generating a code in accordance with a degree of difficulty of coding an image. Since the special technical features are not commonly present in all of the Groups, unity of invention is lacking.

Art Unit: 2613

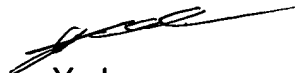

3. A telephone call was made to Ms. Korde on 5/3/04 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
